

Charter for Responsible AI use in Veterinary Practice

Artificial Intelligence (AI) is a powerful tool, but people must remain at the heart of every decision in veterinary practice.

This charter establishes the principles that guide our use of AI, to ensure it is used safely, effectively and ethically for the benefit of animals, our clients, and the profession.

We commit to always be:

- **Veterinary-led** in using AI to support, not replace, our professional judgement and responsibility.
- **Informed** about the capabilities and limitations of AI and critically reviewing its outputs.
- **Fair and inclusive** by promoting the ethical use of AI, being mindful of potential biases and inaccuracies.
- **Trusted** by safeguarding confidential information and being transparent about our AI use.
- **Accountable** through appropriate human oversight for all decisions and actions.
- **Progressive** by continually developing our AI knowledge and skills.
